MOTORS®**

ABLE NEXT QUICK START GUIDE

How to Start the Vehicle

1. **Disconnect the vehicle charge cord:** To unplug, press the button and gently pull the connector out of the socket and refit the protection caps. After that put back the charging socket protection cap and turn it clockwise to lock it. Close the charging socket lid.
2. **Ensure the drive switch is positioned in neutral (N)**
3. **Turn on the ignition** by rotating the key clockwise to the second detent position.
4. **Wait 3 seconds** for the ABLE™ to perform a self-test
5. **Apply the foot brake pedal and release the parking brake**
6. **Put the gearstick in the desired position.**

Charging the ABLE™

1. **Park vehicle in a convenient and dry place** enabling safe installation of the charging cord
2. Make sure you have done the following before beginning to charge the vehicle:
 - **removed ignition key**
 - put the mode selector is on the "**N**" position
 - applied **parking brake**
3. **Access the charging socket:** Open the charging socket lid on the right side of the vehicle, depress the tab on the right to open the charge socket cover
4. **Plug the charging cable into the vehicle charge receptacle:** Remove the protection cap of the charge cable connector if present and plug it into the vehicle charging socket.
5. **Plug the charging cable into a power supply outlet:** A charging station with a permanently fixed cable can be attached directly to the vehicle inlet. When no fixed cable is available, use the provided charge cord.
6. **The Information Center will turn on and indicate charging:** During charging, the status of battery charging is displayed on the Digital Instrument Panel
7. **After charging is complete:** Remove the plug by pressing the button and gently pulling the connector out of the socket. Refit the protection caps if present. Close the socket protection door and lid, wind up the cord and store in clean, dry place out of direct sunlight.

Parking the Vehicle

- Put the mode selector to the "N" position
- Remove the ignition key
- **Always apply the parking brake before exiting the vehicle**
